### Birding Opportunities at Thief Lake Wildlife Management Area

Thief Lake is a 54,957-acre Wildlife Management Area (WMA) located in Marshall County in NW Minnesota. The area was established as a refuge in 1930. A portion of the area includes a 7,100-acre lake and associated shallow wetlands dominated by aquatic plants such as cattail and bulrush. Water levels are controlled by an outlet structure and the lake is managed for wetland wildlife species. In addition there is a large amount of upland brush, oak savannah, mixed deciduous, bottomland hardwood, black spruce/ tamarack, aspen, white spruce/balsam fir, old field, lowland brush and agricultural fields.

Thief Lake is one of the most productive wetlands in Minnesota and is home to unique species including Franklin's Gulls, Forster's Terns, Eared Grebes and Western Grebes.

Accidental (Seen only once or twice in the area)
Ross's Goose
Greater Prairie-Chicken
Cattle Egret
Yellow-crowned Night-Heron
Whooping Crane
Ruddy Turnstone
Red Knot
Bonaparte's Gull
Caspian Tern
Burrowing Owl
Red-bellied Woodpecker
Mountain Bluebird
Varied Thrush
Northern Cardinal
Dickcissel

(Continued from cover page)

A number of waterfowl species breed in the wetlands and associated upland types, including Canvasbacks and American Wigeon. Northern bog species such as Short-eared Owl and Sharp-tailed Sparrow can also be seen here. A total of 218 species have been seen on Thief Lake WMA and 132 are known to breed here.

### Season and Abundance Key

The **seasons** in the checklist are defined as follows:

**Sp** (Spring) = March, April, May

**Su** (Summer) = June, July

**Fa** (Fall) = August, September, October, November

**Wi** (Winter) = December, January, February

Abundance codes are defined as follows:

**A** = Abundant - 50/day or in excess of 250 in a season

**C** = Common - 6-50/day or from 25 to 250 in a season

**U** = Uncommon - 1 to 5/day or from 5 to 25 in a season

**R** = Rare - Season counts of no more than 5

**Nest** - An asterisk indicates that nesting or breeding has been observed

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January 2009), prepared by the Minnesota Ornithological Records Committee. Field documentation of birds of the Thief Lake Area was completed by Shelley Steva with technical assistance from Shirlee Marertens, Frank Swendsen and Thief Lake staff. Additional observations from DNR County Biological Survey. Developed by the DNR Wildlife GIS Group in Bemidji, April 2012.
